

PHASE-I PROJECT

This project performs read and write io operations in TextFile to store, update and print Teacher Details.

Step1: Create project with type Console Application [Working_with_Text_Files]

Step2: Create a model class [Teacher] and declare properties are given below:

Id int

Name string

Class string

Section string

Step3: Create a class to perform different operations on Teacher Information [Manage_Teacher_Info]:

Step 4: Write below function to perform operations:

a. Public bool AddTeacher(Teacher teacher,bool append) :This function is used to add new teacher details into TextFile

(TeacherDetails.txt)

b. public bool UpdateTeacher(int id) : This function is used to update specific Teacher details in the TextFile

(TeacherDetails.txt)

c. public void PrintAllTeacherDetails(): This function is used to print all Teacher information from TextFile (TeacherDetails.txt)

Step 5: To call above functions inside Main of Program class.

Step 6: Project is pushed on github and below is the url for the same.
